2. Detailed description of particular events

<Training 1>

Title: Stakeholder engagement and motivation  
Date: 06.12. 2017  
Place: Sofia

Participants:

Brief description:

We went briefly through the project, its upcoming activities and how BCAC (Bulgarian Climate Action Coalition) can contribute to them, mainly with the development of a vision, roadmap and action plans. Then they learnt about the identification and categorization of stakeholders and the process of their engagement.

Title: Combined training: Policy Analysis, Lobbying for sustainable energy development, Involvement of stakeholders, Roadmapping, Fundraising
Date: 17.05. 2018
Place: Nessebar

Participants:

Brief description:

Participants in the training were members of the Bulgarian Association of Municipal Environmental Experts (BAMEE). In the first day of the training the focus was set on the lobbying for sustainable energy development, the participants also went briefly through the process of stakeholder engagement. The second part of the training focused on the funding opportunities for municipalities as well as project writing where the participants learnt about the specifics and successful practices of preparing project documentation and financing of projects.

A next training with more members of BAMEE is scheduled for later this year.

Photos:
Brief description:

In the first part of the training the participants learnt in details about instruments for sustainable energy development. They were also taken through the process of developing a vision and road map as such instruments. The second part contained practical examples about successful preparation of project documentation as well as opportunities for European and national financing of projects for municipalities in the energy sector.
<Training 4>

Title: Combined training: EU policy, Air pollution – health risks and their reduction, Stakeholder engagement, Roadmapping, Fundraising and project writing.
Date: 27.07. 2018
Place: Pleven

Participants:
Brief description:

Firstly the participants learned about the health risks of air pollution and what are the ways to reduce them. Afterwards they went through the whole process of stakeholder engagement. The second part of the training was focused on the visioning, roadmapping and action planning process. Lastly they learned about successful alternative practices for municipal fundraising and project financing.
