Brief description:

We went briefly through the project, its upcoming activities and how BCAC (Bulgarian Climate Action Coalition) can contribute to them, mainly with the development of a vision, roadmap and action plans. Then they learnt about the identification and categorization of stakeholders and the process of their engagement.

Brief description:

Participants in the training were members of the Bulgarian Association of Municipal Environmental Experts (BAMEE). In the first day of the training the focus was set on the lobbying for sustainable energy development, the participants also went briefly through the process of stakeholder engagement. The second part of the training focused on the funding opportunities for municipalities as well as project writing where the participants learnt about the specifics and successful practices of preparing project documentation and financing of projects. A next training with more members of BAMEE is scheduled for later this year.

Title: Energy planning as an instrument for sustainable development of Bulgarian municipalities Date: 11.06. 2018 Place: Gorna Malina

Participants:

Brief description:

In the first part of the training the participants learnt in details about instruments for sustainable energy development. They were also taken through the process of developing a vision and road map as such instruments. The second part contained practical examples about successful preparation of project documentation as well as opportunities for European and national financing of projects for municipalities in the energy sector.

Brief description:

The participants reviewed and shortened the Bulgarian vision under project Panel 2050. Then they went through the process of roadmap development, familiarized themselves with the specifics of the roadmap content and gave their feedback. They also discussed the next steps and the development of action plans.
