

Climate Alliance

Taking local action on
the global climate crisis

A strong alliance

Facts & figures

Almost 2,000 members

From more than 25 European countries

Corresponding to almost 90 million people
and thus about 22% of the EU population!

Together towards ambitious goals!

Climate Alliance municipalities have each passed a local resolution on membership in which they embrace the association's goals. These are:

- To strive for a 95% **reduction in greenhouse gas emissions** by 2050 compared to 1990 levels, in line with IPCC recommendations.
- To implement effective and **comprehensive climate action** in accordance with Climate Alliance principles.
- To promote **climate justice** together with indigenous peoples by supporting their rights, protecting biodiversity and abstaining from the use of unsustainably managed timber.

Successful climate action needs a systematic approach

Climate action chain

- Set goals (political commitment)
- Develop structures and conditions to act
- Instruments for monitoring and reporting
- Action – provide instruments, campaigns
- Networking

Climate Action Tools

Promoting municipal climate action with climate action tools, such as:

- **Climate Alliance Compass**
Making local commitment visible and offering orientation in climate action
- **RADar!**
The citizen driven reporting platform for municipal cycling networks
- **ESG Cockpit**
Facilitating sustainability reporting in municipal administrations, companies and organisations
- **Climate Protection Planer**
- The recommended CO2 monitoring tool for Climate Alliance members in Germany

Municipal Campaigns

Inspiring citizens to act on climate with creative approaches !

- **City Cycling**
Local politicians and citizens cycle for climate action
- **Green Footprints**
Children collect 'Green Miles' for sustainable behaviour
- **Energy Caravan**
Municipalities motivate citizens to renovate their homes
- **A good life is simple**
Good examples for more sustainable lifestyles

Climate Alliance

Working Groups

Learning from and with each other in Climate Alliance working groups.

Our working groups bring together interested members from across Europe and foster in-depth discussions on relevant topics including:

- **Adaptation**
- **Financing**
- **CO₂ Monitoring**
- **Buildings**

The Covenant of Mayors

Emphasising the importance of cities and towns at European level!

Since 2008, Climate Alliance has been the driving force behind this EU initiative and is also an important actor in the global context. The network

- Leads on the development of common reporting framework and data reporting as well as on the topics of climate **adaptation**, **financial strategies** and **energy poverty**
- Coordinates **national activities** in Italy, Spain, Germany and Belgium

Advocacy Work

Making the local level heard in policy discussions!

Whether on the global level as an official observer of the **UN climate conferences** and **member of the UNFCC organisation of municipalities** or on the European and national levels through **position papers and statements** – Climate Alliance stands up for the concerns of its member municipalities and indigenous partners!

CLIMATE ALLIANCE

European & National Projects

Joining forces to advance municipal climate action!

Climate Alliance is involved in a large number of projects – at national as well as the European level. The goal? To advance, promote and strengthen climate action.

Thematically, the network is broadly positioned – from **adaptation**, **energy poverty** and **deep renovations** to **climate justice**, **mobility** and **renewable energies**.

Indigenous partnership

Supporting indigenous peoples in protecting the Amazon rainforest!

- **Climate partnerships**
Promoting partnerships between European municipalities and indigenous communities
- **Delegation trips**
Enabling municipal representatives to experience indigenous realities first hand
- **Direct support**
Providing structural and financial support for indigenous initiatives through Climate Alliance funds
